

3-Step Passwordless SSO Using QR Code and Security Passkey on Mobile

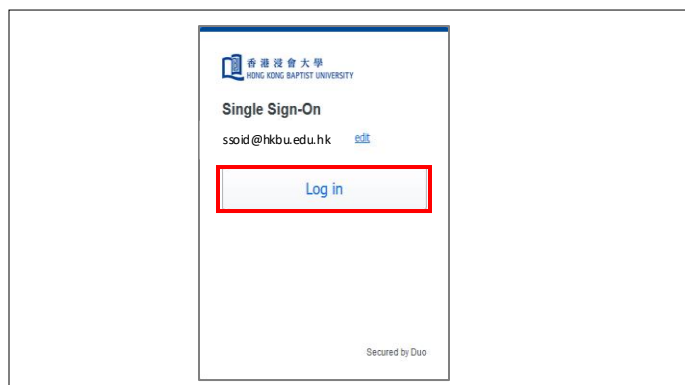

The following describes the **Cross-platform Universal 3-Step Passwordless SSO** using a [Security Passkey registered](#) on your mobile:

(1) Enter Username, (2) Scan QR Code, and (3) Verify your identity with Biometrics.

Prerequisites:

- 1) [Register Your Phone as a Universal Security Passkey](#) (Authentication Device)
- 2) Turn ON Bluetooth on BOTH the Login and Authentication Devices

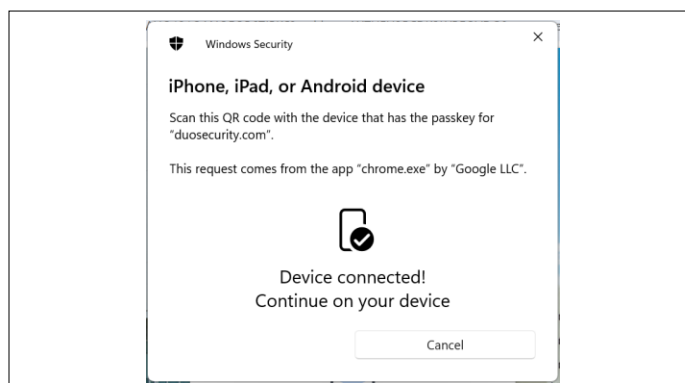

This is a **RECOMMENDED** Passwordless SSO method for users of **Departmental/Project or Student Organisation Accounts** in which logins are shared among multiple staff members/students of the department/unit/organisation.

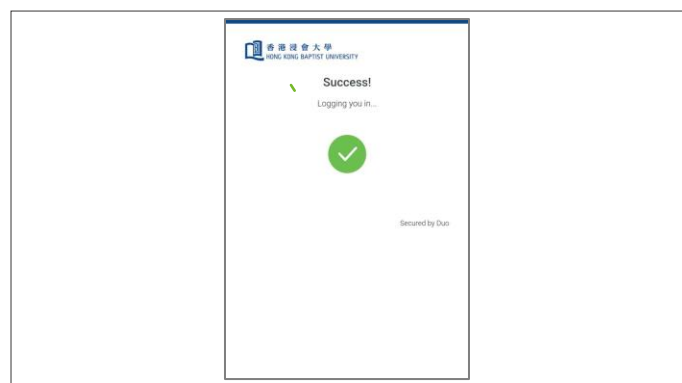

1 Access any [Passwordless-SSO-Supported application service](#) on a **Bluetooth-enabled** device (the "Login Device"). Enter **Username**, then Click "**Log in**"

2 Scan the QR Code displayed on screen using your mobile device (the "Authentication Device") that registered with your Security Passkey.

3 Follow the instructions on the phone to complete the authentication.

4 Successfully authenticated.
