

Sign-On Using a "Passwordless Registered Device" or "One-time" Verification Code

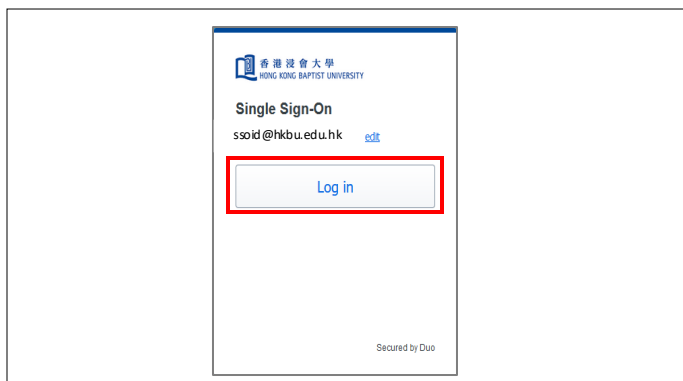

The following describes the steps to perform Passwordless SSO Authentication using a "Passwordless Registered Biometric Device":

- A:** Android Device with Biometric
- B:** iOS Device with Face ID/Touch ID
- C:** macOS PC/Laptop with Touch ID
- D:** Windows PC/Laptop with Windows Hello

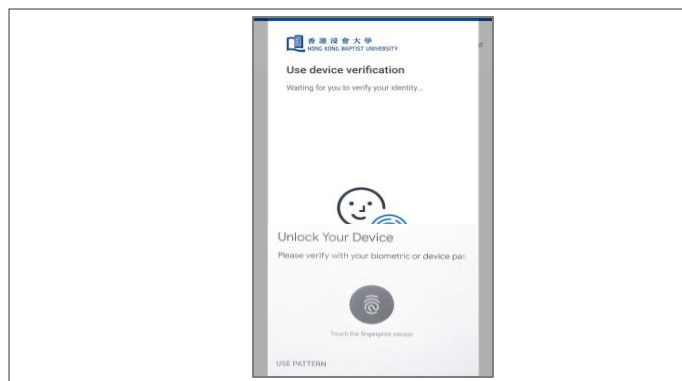

The following describes the steps to perform Passwordless SSO Authentication using a DUO Mobile App (**One-time Verification Code**):

- E:** Devices without Biometric (Verified by DUO Mobile App on Android)
- F:** Devices without Biometric (Verified by DUO Mobile App on iOS)

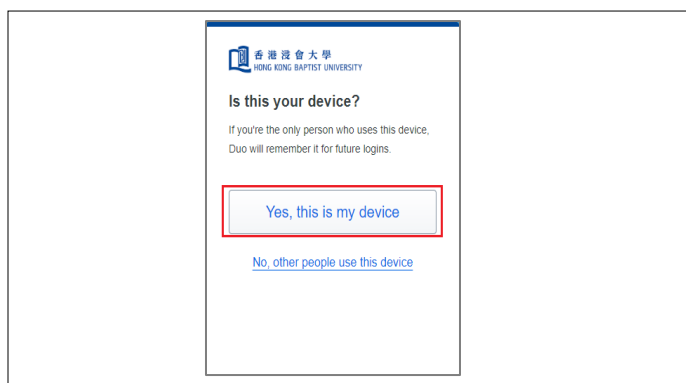

A: Android Device with Biometric

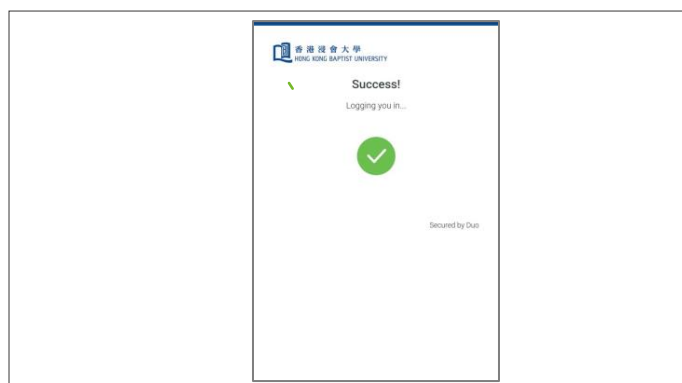

1 Access any Passwordless-supported SSO service/application with a registered Android device. Then click '**Log in**'.

2 Authenticate with Biometric on your Android device.

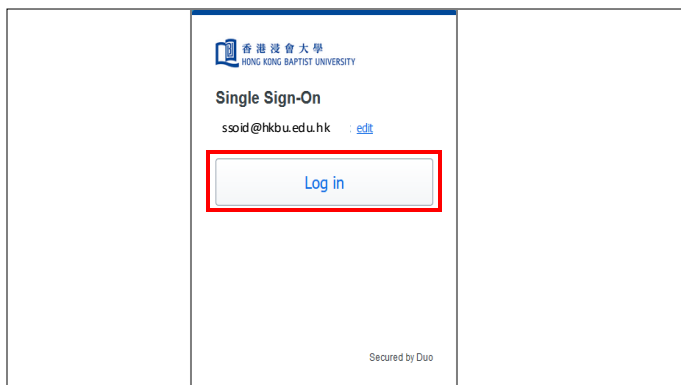

3 Click '**Yes, this is my device**' if you are using your own device.

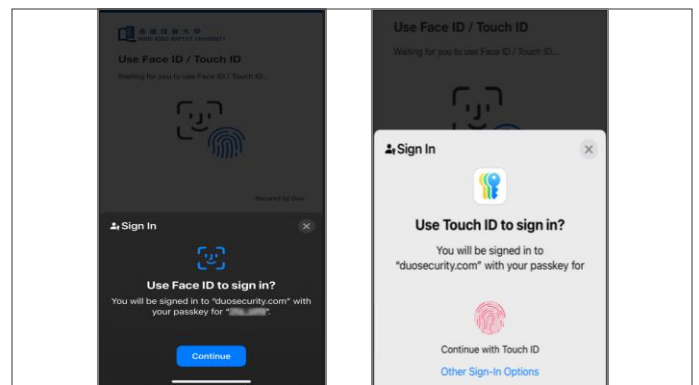

4 Successfully authenticated.

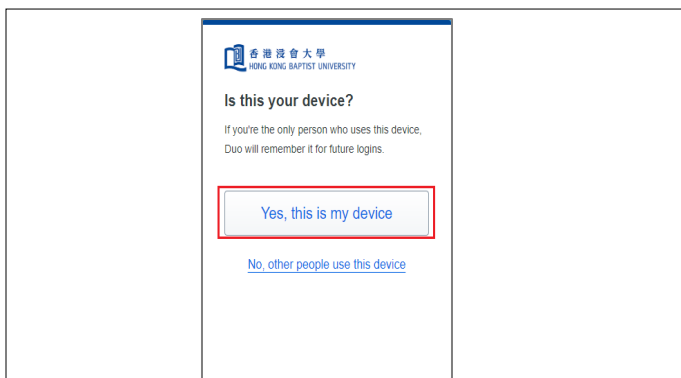

B: iOS Device with Face ID/Touch ID

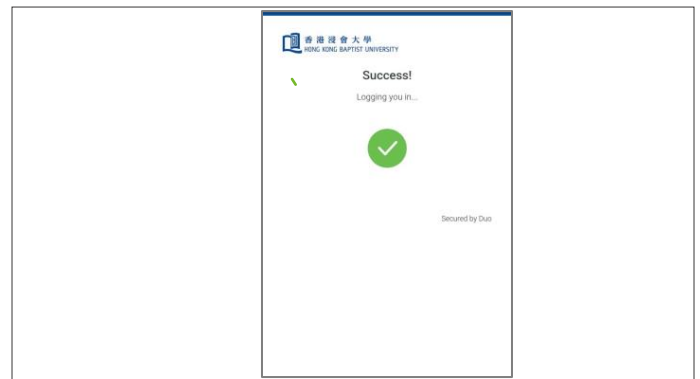

1 Access any Passwordless-supported SSO service/application with a registered iOS device. Then click '**Log in**'.

2 Authenticate with Face ID/Touch ID on your iOS device.

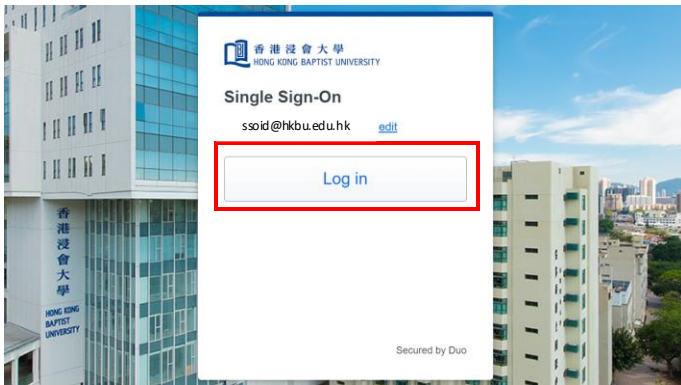

3 Click '**Yes, this is my device**' if you are using your own device.

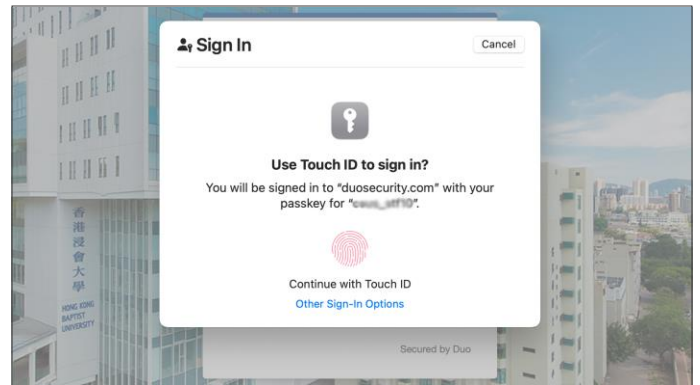

4 Successfully authenticated.

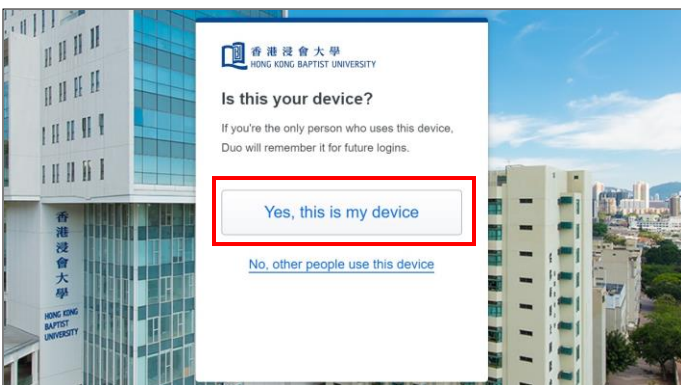

C: macOS PC/Laptop with Touch ID

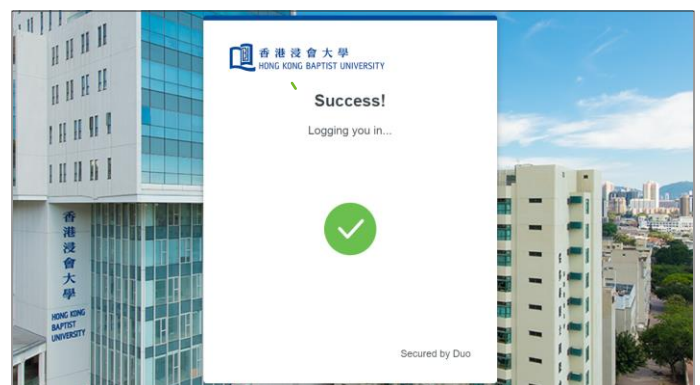

1 Access any Passwordless-supported SSO service/application with a registered macOS device. Then click '**Log in**'.

2 Authenticate with Touch ID on your macOS device.

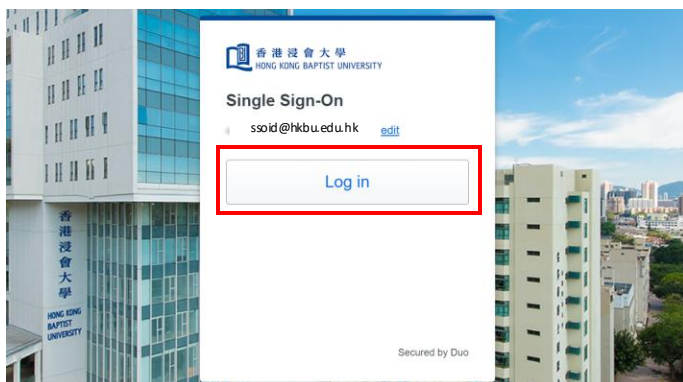

3 Click '**Yes, this is my device**' if you are using your own device.

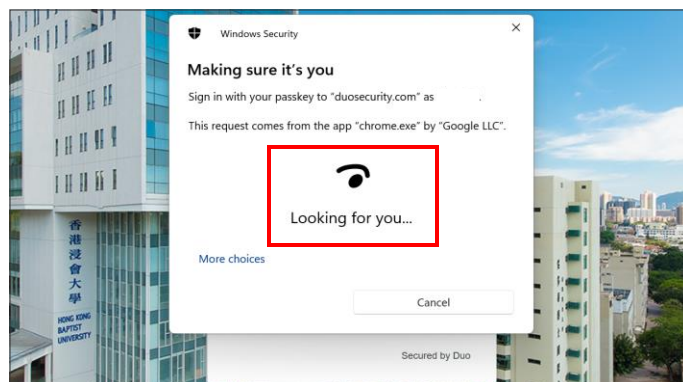

4 Successfully authenticated.

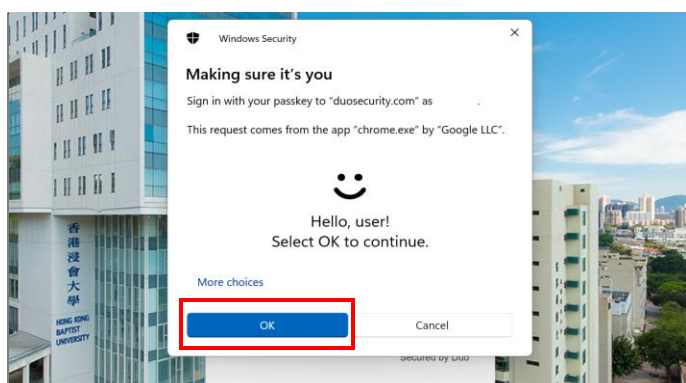

D: Windows PC/Laptop with Windows Hello

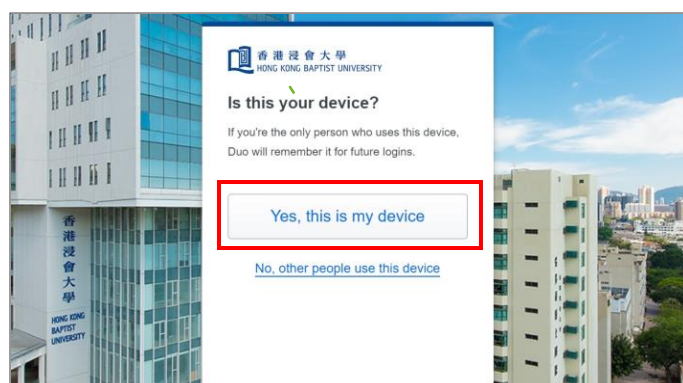

1 Access any Passwordless-supported SSO service/application with a registered Windows device with Windows Hello enabled. Then click '**Log in**'.

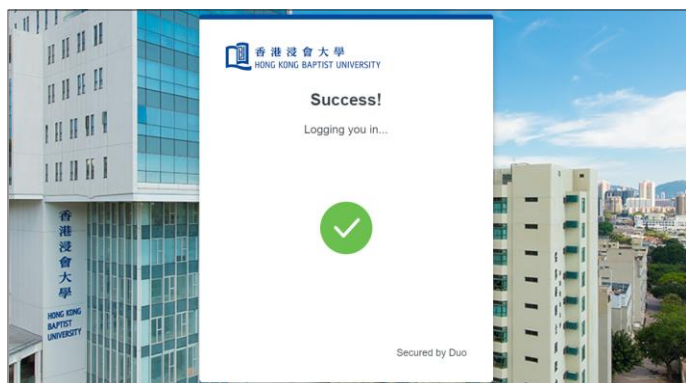

2 Authenticate using Windows Hello on your device.

3 Click '**OK**' to continue.

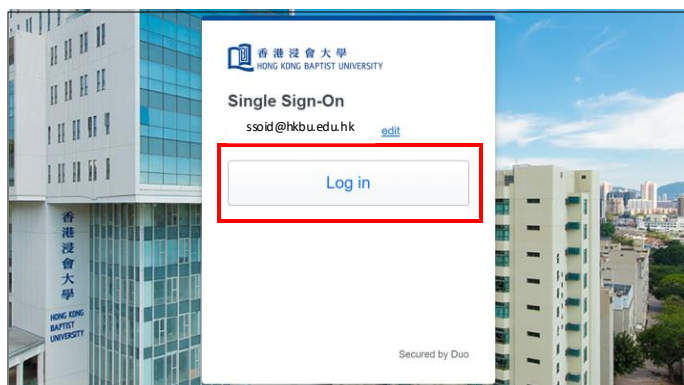

4 Click '**Yes, this is my device**' if you are using your own device.

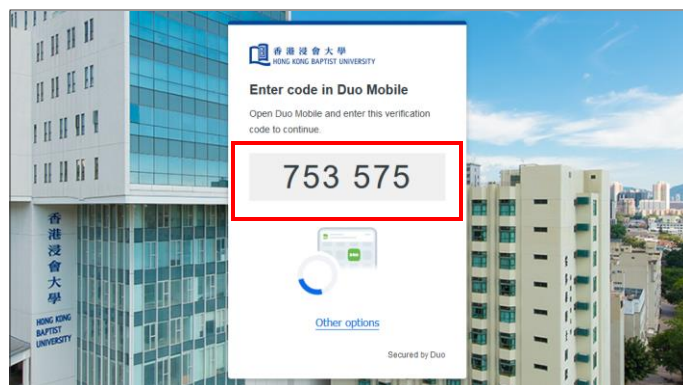

5 Successfully authenticated.

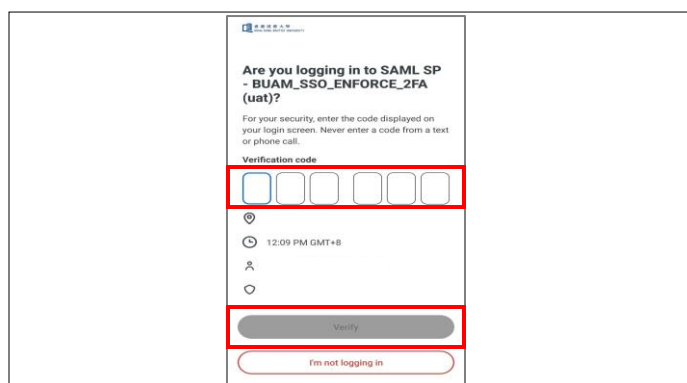

E: Devices without Biometric (Verified by DUO Mobile App on Android)

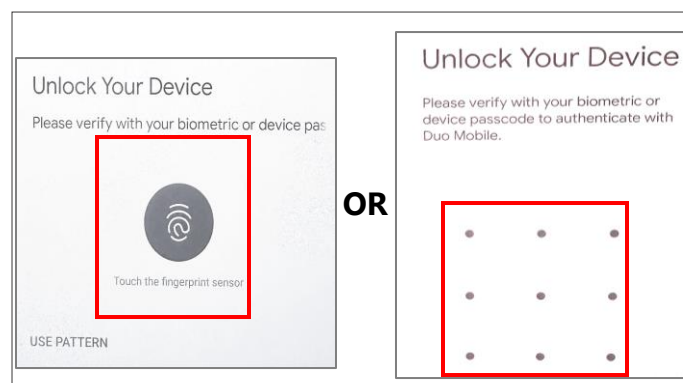

1 Access any Passwordless-supported SSO service/application with an Android device without Biometric. Then click '**Log in**'.

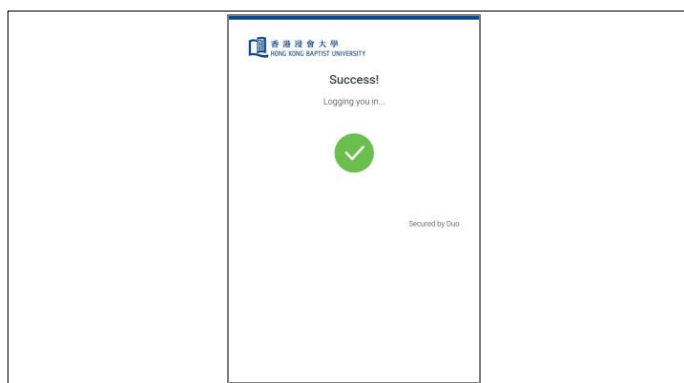

2 A verification code will be shown as above.

3 Enter the verification code shown in Step 2 on Duo Mobile App and click '**Verify**'.

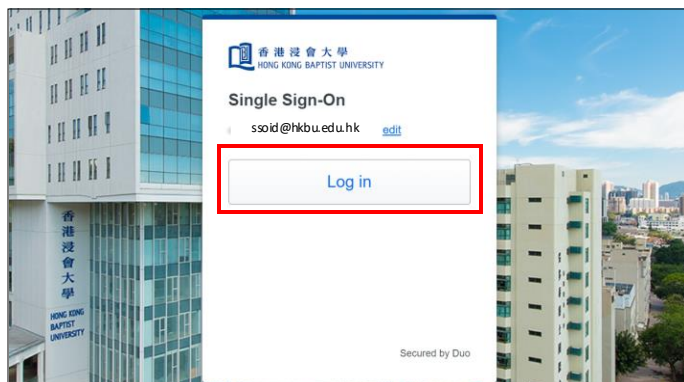

4 Authenticate with Biometric / Pattern on Duo Mobile app.

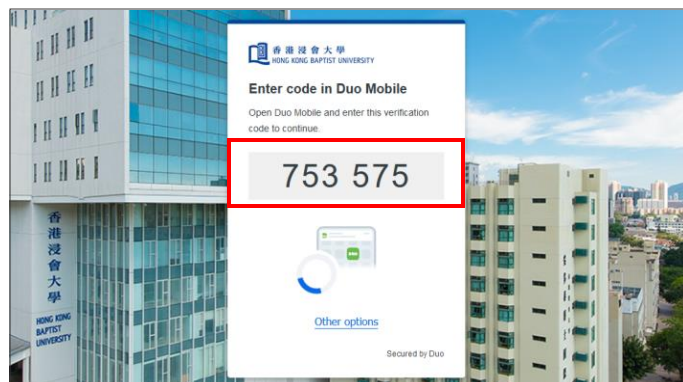

5 Successfully authenticated.

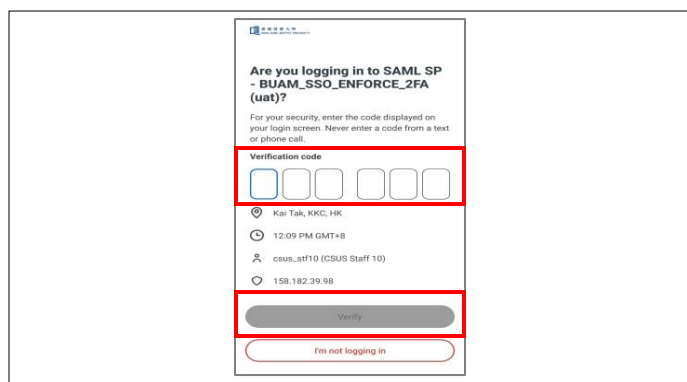

F: Devices without Biometric (Verified by DUO Mobile App on iOS)

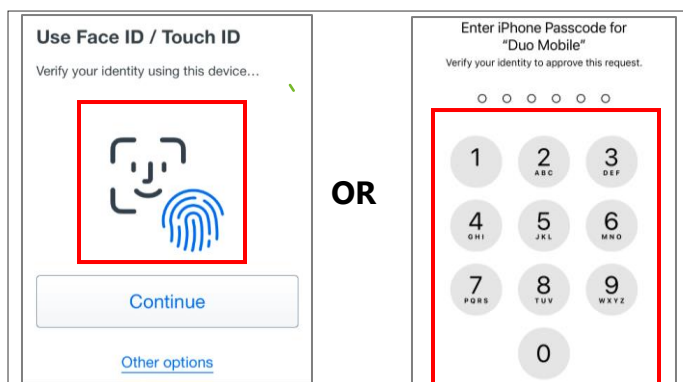

1 Access any Passwordless-supported SSO service/application with a device without Biometric. Then click 'Log in'.

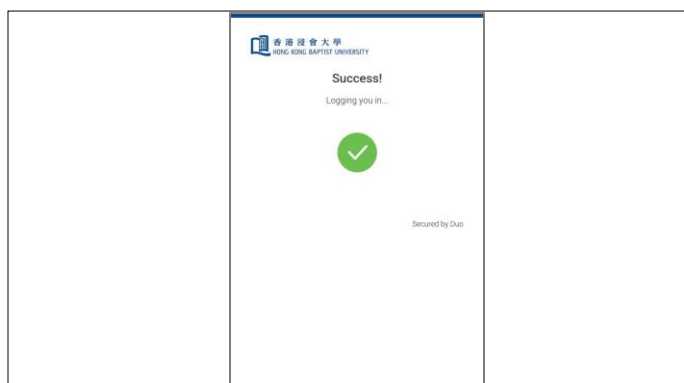

2 Verification code will be shown.

3 Enter the verification code shown in Step 2 on Duo Mobile app and click '**Verify**'.

4 Authenticate with Biometric / Passcode on Duo Mobile app.

5 Successfully authenticated.
