Steps to connect (Universities via CSL / Universities via Y5ZONE / eduroam)

Note: This is a general setup guide. The steps may vary on different Android versions.

1. Select "Settings" > "Wi-Fi" > "Universities via CSL" or "Universities via Y5ZONE" or "eduroam".

2. Select "Advanced options", input the parameters as below, click "Connect", then done.

	eduroam	EAP method: <mark>PEAP</mark>
	EAP method PEAP >	Phase 2 authentication: MSCHAPV2
	Phase 2 auth MSCHAPV2 >	CA certificate: Use system certificate
Wi-Fi	CA certificate Use system certi >	Online Certificate Status: <mark>Do not validate</mark>
Wi-Fi	Online Certificate Status	Domain: <mark>cert.hkbu.edu.hk</mark>
Wi-Fi assistant		Privacy: Use device MAC
eduroam	Must specify a domain.	ldentity: ssoid@hkbu.edu.hk
Identity	Privacy Use device MAC	(e.g. <u>16101234@hkbu.edu.hk</u>)
Password	Identity	Password: Your password
Advanced options Connect	Simple options Connect	*** If you have an option "Client certificate", select N/A

Important - You may still get connected by select the desired SSID and simply input your identity and password only, but it has a security risk. **In order to prevent your credential from stolen over-theair, please strictly follow this setup guide**.
