

## A. Pre-requisite

To access **BU-Standard**, the Android version must be v2.2 or above.

## B. Configuration Procedure (to be done once only)

1. Go to the **main** menu.
2. Choose **Settings**.
3. Choose **Wireless & Networks**.
4. Choose **Wi-Fi settings**.

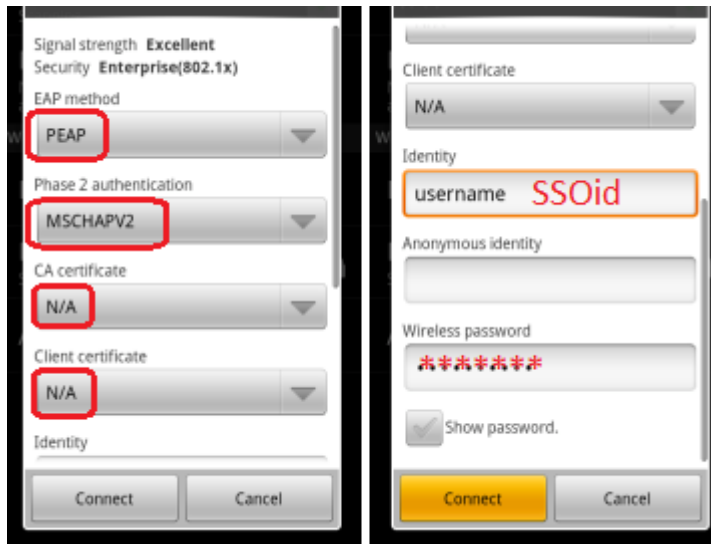

5. Tap **BU-Standard**.
6. Set **EAP Type** to **PEAP**.
7. Set **Phase 2 Authentication** to **MSCHAPV2**.
8. Set **Identity** to your **HKBU SSOid**.

### **SSOid (Single-Sign-On Identity)**

For student: his/her student number, e.g. 12000000

For Staff: his/her email-name, e.g. chanman for chanman@hkbu.edu.hk

9. Set **Wireless password** to your **unified-password**.

\*\*\* No need for CA or Client certificate.

10. Click **Save**.

11. Android should now connect to BU-Standard automatically.

### C. Security Note

Since HKBU SSOid and unified-password are employed to login at BU-Standard Wi-Fi, as a better password security measure, you should change your unified-password periodically.
